

**Amendments to the Claims:**

**Listing of Claims:**

Claim 1 (original): A scribe line structure, comprising:

a substrate;

5 a plurality of dielectric layers formed on the surface of the substrate comprising at least a process monitor pattern set in a scribe line region; and

a dummy metal structure formed on the surface of the substrate connecting with the process monitor pattern and exposed in the scribe line region.

10 Claim 2 (original): The scribe line structure of claim 1 wherein the plurality of dielectric layers comprise dielectric layers having a dielectric constant less than or equal to 3.

Claim 3 (original): The scribe line structure of claim 1 wherein the dummy metal structure comprises a plurality of dummy vias.

15

Claim 4 (original): The scribe line structure of claim 1 wherein the dummy metal structure comprises a plurality of dummy metal layers.

20 Claim 5 (original): The scribe line structure of claim 1 wherein the process monitor pattern is made of metal materials.

Claim 6 (original): The scribe line structure of claim 1 wherein the process monitor pattern comprises test keys, feature dimension measuring elements, or alignment marks.

25 Claim 7 (original): The scribe line structure of claim 1 wherein the surface of the substrate further comprises a protective layer covering two sides of the surface of dielectric within the scribe line region.

Claim 8 (original): A scribe line structure, comprising:

a substrate, the surface of the substrate comprising at least a scribe line region;  
a plurality of dielectric layers formed on the surface of the substrate comprising at least a process monitor pattern set in the scribe line region; and

5 a heat irradiative structure formed in the plurality of dielectric layers connecting the plurality of dielectric layers with the surface of the substrate and exposed in the scribe line region.

Claim 9 (original): The scribe line structure of claim 8 wherein the plurality of dielectric  
10 layers comprise dielectric layers having a dielectric constant less than or equal to 3.

Claim 10 (original): The scribe line structure of claim 8 wherein the heat irradiative structure is a dummy metal structure.

15 Claim 11 (original): The scribe line structure of claim 10 wherein the dummy metal structure comprises a plurality of dummy vias.

Claim 12 (original): The scribe line structure of claim 10 wherein the dummy metal structure comprises a plurality of dummy metal layers.

20

Claim 13 (original): The scribe line structure of claim 8 wherein the heat irradiative structure connects with the process monitor pattern.

Claim 14 (original): The scribe line structure of claim 8 wherein the process monitor  
25 pattern is made of metal materials.

Claim 15 (original): The scribe line structure of claim 8 wherein the process monitor pattern comprises test keys, feature dimension measuring elements, or alignment marks.

Appl. No. 10/710,761  
Amdt. dated January 02, 2007  
Reply to Office action of October 02, 2006

Claim 16 (currently amended): The scribe line structure of claim 8 wherein the surface of the substrate further comprises a protective layer covering two sides of the surface of dielectric surface-within the scribe line region.
